Contract announcement #99-02

11 January 1999

Reeling Machine Test Set (RMTS)/Air Frames Facility, Borg El Arab Air Base, Alexandria, Egypt

The U.S. Army Corps of Engineers Transatlantic Programs Center has awarded a contract (DACA78-99-C-0003) for the construction of an intermediate level maintenance building for the SH-2G helicopter and a utility building at Borg El Arab Air Base, Alexandria, Egypt.

The maintenance building will house the Reeling Machine Test Set (RMTS) shop and the following shops: hydraulic, welding, corrosion control shop, paint, tire/wheel, non-destructive inspection (NDI), and avionics; as well as mechanical/electrical room, toilet room and offices.

The contract was awarded Nov. 24, 1998 to Sorenson Gross/Arabian International, 3407 Torrey Road, (P.O. Box 7718), Flint, Mi., 48507, in the amount of \$1,322,908. Contract duration is 15 months.

The Transatlantic Programs Center is working in Egypt under the auspices of the U.S. Defense Department's foreign military sales program, which allows eligible foreign governments to purchase defense equipment and services from the United States.
